

Data For Science and Health

Vision: Trustworthy data science transforms how science solves urgent health challenges facing everyone

Put trust into practice...

...through changing how **data & software** in health are funded, developed & governed

Equip & motivate researchers...

...with **tools & opportunities** to innovate with health data in the public interest

Trust in practice

Trust becomes hallmark of good health data science

Tools to transform

Open tools democratise & accelerate innovation

Talent with incentive

Teams equipped & motivated to solve challenges

Influence for trustworthy data science

More, better software and data science funded & practiced
