

# Just how **GREEN** are remote events?

1 day meeting at the UN: 200 people  
60 locals, others spread uniformly 1,000 to 20,000 km

In-person = **371 tonnes CO<sub>2</sub>**  
travel, infrastructure, hotels

Online = **2.4 to 13 tonnes CO<sub>2</sub>**  
network, server, user, device LCA

**At least 96.2 less CO<sub>2</sub> going online**
